

Arizona Data Committee

Update on Fire Status

June 22, 2011

Candace Bogart –GIS Program Mgr, USFS

Arizona Fire Status Web Sites

- Inciweb – good overall announcements, perimeters, maps and news. <http://www.inciweb.org/>
- Southwest Coordination Center – An interagency Incident Support Website . <http://gacc.nifc.gov/swcc/>
 - This webpage supports New Mexico and AZ
- GeoMAC – USGS site and Dept of Interior and USDA
 - This site has a mapping application.
<http://www.geomac.gov/index.shtml>
- USGS Remote Sensing Applications Center – geospatial datasets relevant to fire management.
<http://activefiremaps.fs.fed.us/index.php>

WALLOW FIRE

Current Fires and Data Collection

- Wallow Fire — ongoing analysis by A/S and RO. Plans to obtain digital photography, orthophotography. Data available for BARC, revegetation planning, NEPA.
- Monument Fire — no current acquisition yet
- Horseshoe II Fire — Plans to obtain 1:12,000 aerial photography, scans and high insentivity DEMS in selected areas for burned area rehabilitation.
- Willow Fire — no current acquisition yet

Project Analysis

- Apache/Sitgreaves NF – ongoing analysis, map development.
- RO – RO @ABQ
- National Infrared Program Manager at RO in Geospatial Staff. IR perimeters downloaded and posted to ftp site.
- RO Staff – wildlife issues, endangered fish, forest activities, regeneration planning, vegetation mortality and burned area assessments.

WALLOW FIRE
